Lawrence Nieves

CREATIVE PRODUCER / PROJECT MANAGER

Atlanta-based · Open to relocation

Blending creative technology, immersive experiences, and cross-functional leadership

Introduction

I’m Lawrence Nieves, a project manager and creative producer who blends technology, storytelling and immersive experiences. Over five years across XR, virtual reality and creative operations, I’ve helped teams turn ambitious ideas into well-executed projects.

From directing 360° VR shoots to building interactive AI-driven installations to leading multi-stakeholder production teams, I bring hands-on technical knowledge and organizational leadership. The best work happens when creative and technical experts are empowered to do what they do best, and I’m driven to help make that happen.

On a motion-capture stage

What I do

PRODUCTION	Project management and production leadership
IMMERSIVE	VR, AR, 360° video and interactive installations
TEAMS	Collaborative development and cross-functional coordination
APPROACH	Ethical design and creative innovation
TOOLS	Jira, Notion, Smartsheet, Unity, C#, Python, SQL, Snowflake, Power BI, Tableau

Career phases

This presentation walks through each phase of my career in order, from my college projects to the experiential work I want to do next.

	01	Art projects for fun, college	2018–21
	02	XR, QA to project manager	2020–24
	03	PM in data	2024–present
	04	The experiential industry	Next

01

Art projects for fun, college

2018–21. I studied the Business of Creative Enterprises at Emerson College, with a focus on virtual reality. I loved the idea of making experiences people could interact with. Here are some of those projects.

2021 · Personal · Interactive documentary

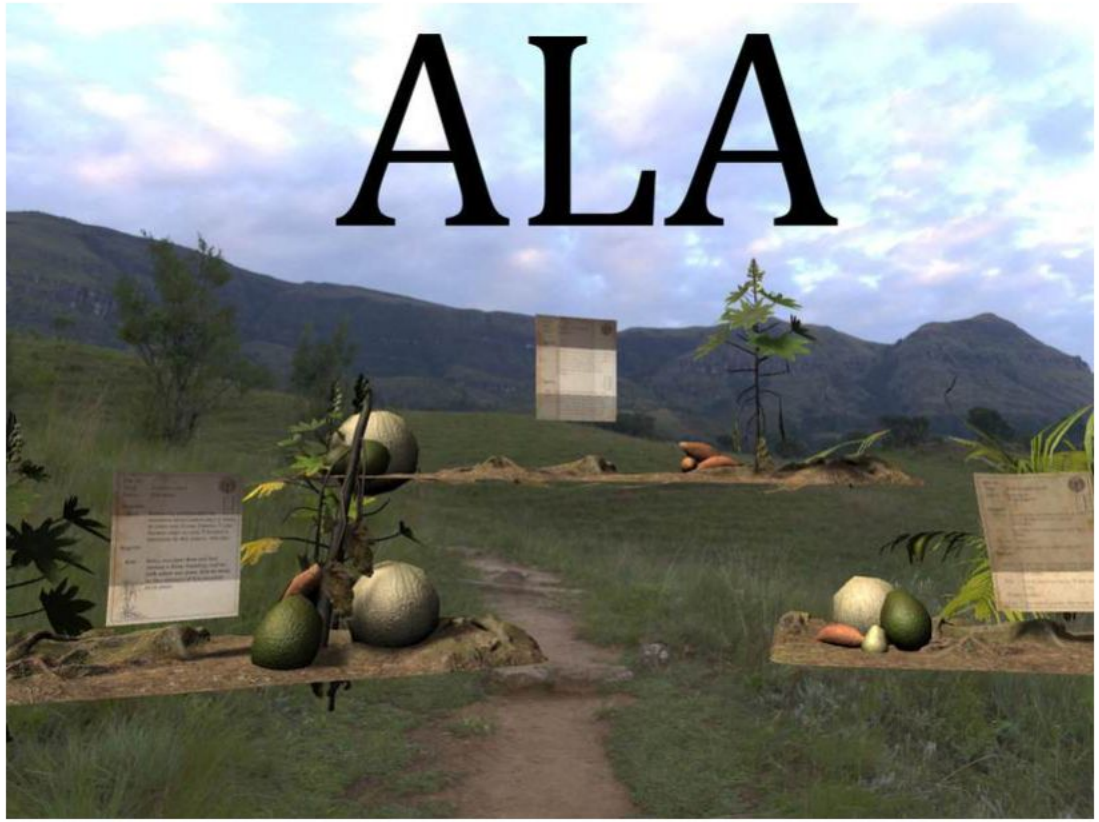

ALA

An open-world documentary about my grandmother’s life in 1950s Puerto Rico: FBI surveillance, mass sterilization and cultural memory

I programmed the whole experience in Unity, guiding people through her world with depth-mapped photos and immersive rooms

Original audio recorded across three generations of my family

Trailer on YouTube →

Promotional image

2020 · Personal · VR · GPT-2

LEN1

A speculative look at digital privacy and self-representation

I trained a GPT-2 model on my own text history, making an AI “Lawrence” who lives inside a virtual home

Visitors asked it intimate or embarrassing questions while exploring a space I built entirely in ShapeLab

Play it on itch.io →

2021 · Collaborative · 360° film

A Father Is Persevering

A 360° film made with an incarcerated father, advocating for an end to mandatory minimums

I co-led the interviews and taught 360° filming

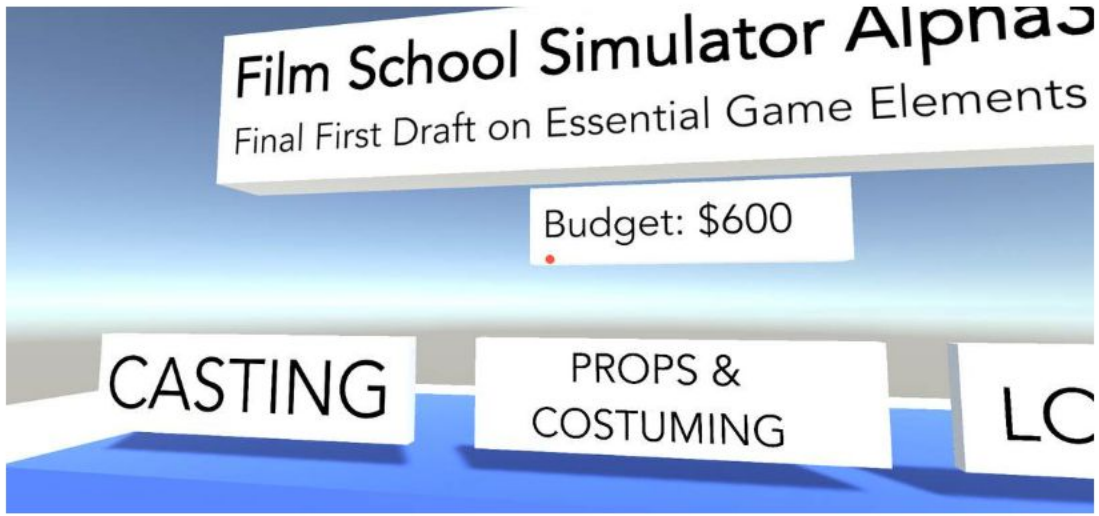

I found a way to animate Tilt Brush art inside Unity, so the family's own drawings surround the audience

Watch on YouTube →

A father and daughter at the park, in 360°

Earlier work

2019 · Emerson College · Google Cardboard

Film School Simulator

An interactive film experience funded by an Emerson College film organization. I led a team of 30+ students.

2018 · Installation · Unity

Interactive Museum

A VR installation that controlled live gallery displays. I integrated Unity with web systems.

02

XR, QA to project manager

2020–24. I started as a QA intern at Foundry 45 and grew into a project manager for VR training. When Axon acquired the company, I kept doing that work there.

2020–22 · Enterprise VR training

Foundry 45

Investigatory Stop POC. Co-led design and motion capture for VR police training, later contributing to Axon's acquisition of the company.

Rheem Interactive Training. Designed and PM'd an award-winning VR tutorial on hybrid water heaters, with interactive models and time trials.

Road Code. Oversaw backend analytics and the distribution of 200+ VR kits to Boys & Girls Clubs nationwide.

Delta Marshalling Tutorial. Extended VR modules for aircraft marshalling safety with new features and a night mode.

Rheem hybrid water heater walkthrough

Walkthrough on YouTube →

CLIENTS

Rheem, Delta, UPS, TriMet and Boys & Girls Clubs of America

2022–24 · Axon · Interactive 360

Interactive 360 TASER Training

I pitched, funded ($750K+) and directed immersive police training scenarios

Filmed on location in Poland and Los Angeles

Built as interactive 360° video in Unity

Interactive 360 on YouTube →

On location for a pawn-shop scenario

More at Axon

2022–24 · Axon · VR training

Simulator Drills

I PM’d dev teams building realistic TASER and movement modules, working through hardware constraints and SME feedback.

2022–24 · Axon · Game · Video →

TASER vs. Zombies

A playful reskin of an existing game to show off new TASER hardware. I managed teams in the US and Poland.

03

PM in data

2024–present. Operations leadership and data governance at Inspire Brands.

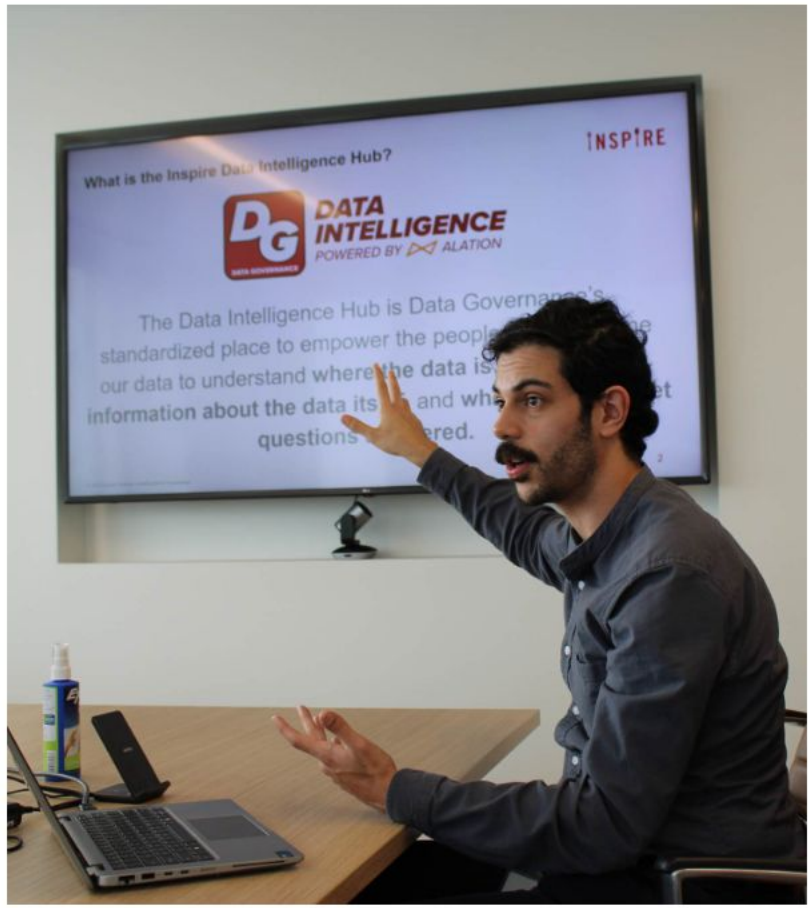

2024–present · Inspire Brands

Operations and data governance

I expanded into operations leadership and data governance across Inspire’s restaurant brands

Led projects using Snowflake, Power BI, SQL and Tableau

Drove process improvements, stakeholder communication and system optimization at scale

Presenting the Data Intelligence Hub

04

The experiential industry

For years I've led complex technical projects: managing vendors and budgets, bringing opinionated people to one decision, and fixing the processes underneath. Now I want to use those same skills to make things people can touch and inhabit, at studios and cultural institutions that care about the work.

On a logistic note, while I am currently based in Atlanta I am looking to relocate myself by EOY 2026.

Thank you.
